Photo booth

Components

Shell

Camera

Ring light

Touch screen 27"

Branding sticker

Printer's rack

LED neon

Printer output

Description

An open-plan automated machines that are designed to capture and print photos in a specific format that meets the users's photo requirements. Multiple copies can be printed so users can save some for future memories.

After capturing photo(s) , the photo booth begins developing the image - a process that used to take several minutes in the old "wet chemistry" booths- but is now typically accomplished in about 10 seconds with digital technology.

The prints are then delivered to the customer.

Typical dimensions of the vese prints vary.

It uses a digital camera, and are under computer control with (touch screen).

Components

Stand

Touch screen 43"

Branding sticker

LED neon

Description

43" touch screen monitor provides a brilliant canvas for adding interactivity to any environment.

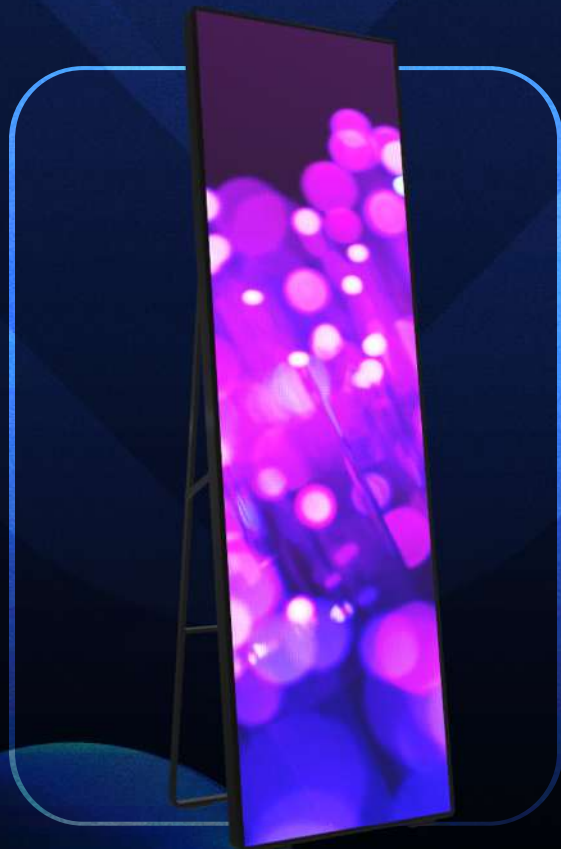

Perfect for everything from endless aisle and brand experiences to menu boards, collaborative meetings and dashboarding, the digital signage display offers a sleek, slim design built to withstand the rigors of continuous commercial use. And with computer modules, you can easily turn the display into a powerful, all-in-one, life-size 43-inch tablet.

Extremely sensitive response time and anti-friction glass to minimize heat as fingertips drag across the screen. Also offers touch thru capability, allowing the 43" interactive display to be mounted behind a mirror, in a counter or in a fully encased kiosk for added durability or aesthetics.
